

CR MINERALS ANNOUNCES GLOBAL PRICE INCREASE

Ohkay Owingeh, NM- November 27, 2017- CR Minerals Company, LLC announced today a price increase for pumice products effective January 1, 2018. Prices will increase an average of 5% or as contracts allow. This price adjustment comes as a result of several factors which include increased mining and production costs. CR Minerals continues to pursue cost-reducing initiatives to help reduce these growing costs.

About CR Minerals- CR Minerals is a leading worldwide producer of high quality pumice products, located in Ohkay Owingeh, NM. Our products are used in a wide variety of applications including abrasives, fillers, cleaners, paints, coatings, metal finishing, silicone rubber, plastics, water treatment, and construction materials. In addition, pumice is a preferred lightweight aggregate used in manufactured stone veneer and concrete block. CR Minerals has been in business since 1948 and with our high quality pumice deposit and state of the art processing plants, our products will continue to lead the market for decades to come.
